

Required Computer Settings **e-QIP Users**

Before you attempt to access the e-QIP Application on line please check the security settings on your web browser by following these simple steps:

1. Open your browser and select “Tools” on the tool bar.
2. Next select “Internet Options”.
3. When the dialogue box opens select the “Advanced” tab on the far right-hand side at the top inside the box. Scroll most of the way down the list until you reach the Security Selections. Make sure there is a check mark in the box that says “Use TLS 1.0”. If there is no check mark click on the box and one should appear.
4. After that, click “Apply” and then “Okay”. This will enable your browser to run the program properly and securely. It should not interfere with any of your regular computer functions.
